*Fund currently makes distributions in accordance with a managed distribution plan. Distributions may include amounts characterized for federal income tax purposes as ordinary dividends (including qualified dividends), capital gain distributions and nondividend distributions, also known as return of capital distributions. Return of capital distribution may include a return of some or all of the money that an investor invested in Fund shares. With each distribution, the Fund issues a notice to shareholders and a press release containing information about the amount and sources of the distribution and related information. Notices and press releases for the last 24 months are available on our website (<http://funds.eatonvance.com/19a-Fund-Distribution-Notices.php>). The amounts and sources of distributions are only estimates and are not provided for tax reporting purposes. Fund reports the character of distributions for federal income tax purposes each calendar year on Form 1099-DIV. In recent years, a significant portion of the Fund's distributions has been characterized as return of capital.

Fund's distributions in any period may be more or less than the net return earned by the Fund on its investments, and therefore should not be used as a measure of performance or confused with "yield" or "income." Distributions in excess of Fund returns will cause its NAV to erode. Investors should not draw any conclusions about a Fund's investment performance from the amount of its distribution or from the terms of its managed distribution plan. The Fund's distributions are determined by the investment adviser based on its current assessment of the Fund's long-term return potential. As portfolio and market conditions change the rate of distributions paid by the Fund could change.

Fund Highlights

- The Fund invests in a diversified portfolio of domestic and foreign common stocks with an emphasis on dividend paying stocks and writes call options on one or more U.S. and foreign indices with respect to a portion of the value of its common stock portfolio to generate current cash flow from the options premium received. The Fund evaluates returns on an after tax basis and seeks to minimize and defer federal income taxes incurred by shareholders in connection with their investment in the Fund.
- The Fund pays monthly distributions to shareholders pursuant to a managed distribution plan*.
- NYSE listing provides daily liquidity.

Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when sold, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Fund's current performance may be lower or higher than quoted. The Fund's performance at market price will differ from its results at NAV. Returns are historical and are calculated by determining the percentage change in net asset value or market price (as applicable) with all distributions reinvested and includes management fees and other expenses. Performance less than or equal to one year is cumulative. For performance as of the most recent month-end, please refer to eatonvance.com.

¹The premium/discount is calculated as [(market price/NAV)-1].

²Portfolio Overview is presented as of total net assets. Portfolio profile subject to change due to active management. % of Stock Portfolio with call options written is based on the notional value of the options. A call option is in-the-money if the strike price is below the price of the security/index and out-of-the-money if the strike price is above the security/index. A put option is out-of-the-money if the price of the underlying security is above the strike price.

³The Distribution Rate is based on the Fund's last regular distribution per share (annualized) divided by the Fund's Net Asset Value (NAV) or market price (the price at which the Fund is traded on the exchange) at the end of the period.
